

District of Columbia

The Supplemental Nutrition Assistance Program (SNAP) is a powerful tool for ending hunger in the United States. SNAP benefits are provided on an Electronic Benefit Transfer (EBT) card and can only be used to purchase food items from grocery stores, farmers' markets and other food retailers.

These benefits help low-income families put enough food on the table and reach the state's most vulnerable residents, including children, seniors and people with disabilities. Here is a look at the impact this program has in the District of Columbia.

DISTRICT OF COLUMBIA SNAP: BY THE NUMBERS

NUTRITION EDUCATION

SNAP-Ed is the nutrition education and obesity prevention component of SNAP. SNAP-Ed funding supports programs that equips low-income Americans with the skills they need to make healthy food choices on a budget through cooking classes, grocery store tours and educational materials.

Research shows that the skills learned through SNAP Ed can have a significant impact on the number of days families face hunger during the month. It also leads to healthier food choices; two thirds of families participating in nutrition education are more likely to eat more fruits and vegetables and read ingredient lists to find whole-grain options.

Although this funding helps families more effectively stretch their food budgets and create healthier eating habits, **less than 1%** of the SNAP budget goes to nutrition education. Learn More at <http://bit.ly/SNAPED>.
